

ANNUAL
OCCUPATIONAL HEALTH & UNIVERSAL PRECAUTIONS
STAFF TRAINING PROGRAM
FOR 2016-17 SY

I have reviewed the videos about Blood Borne Pathogens, managements of students with life-threatening allergies, care of the student with diabetes, universal precautions and the proper emergency uses of EpiPen and understand that it is my responsibility to follow the Occupational Health Policy and follow Universal Precautions when undertaking exposure prone tasks or duties. I know how to respond to a student with a known or unknown life-threatening emergency. I have been taught the basics of the care of a student with Diabetes.
